

Fulghum, MacIndoe, & Associates, Inc. recognized by Inc. Magazine and CE News

Knoxville, Tennessee, October 1, 2009 – Fulghum, MacIndoe, & Associates, Inc. (FMA) recently received two significant awards. Inc. Magazine named FMA one of the nation's 5000 fastest growing companies. CE News recognized FMA in their Top 40 List of The Best Civil Engineering Firms to Work For in the United States.

Inc. Magazine's Top 5000 list ranks firms based on revenue growth. FMA achieved extraordinary revenue growth through the development of new clients, as well as the retention of current clients. This growth is a credit to FMA's mission to complete projects on time, within budget, and with no surprises.

CE News' Top 40 List selects firms that create outstanding work environments for their employees. FMA stresses integrity, honesty, and teamwork. These principles resonate throughout FMA. Employees are motivated to use their talents and skills in challenging and innovative ways. These efforts are rewarded through employee recognition awards and a positive work environment at FMA.

Together, the awards demonstrate FMA's capability to provide great customer service, design cost effective solutions and cultivate an energized work environment despite this year's difficult economic conditions.

FMA performs civil, electrical, and environmental services for private developers, municipalities, and architects throughout east Tennessee. For additional information on FMA's achievements or services, please contact Mr. William Fulghum or visit the FMA website at www.fulghummacindoe.com.
